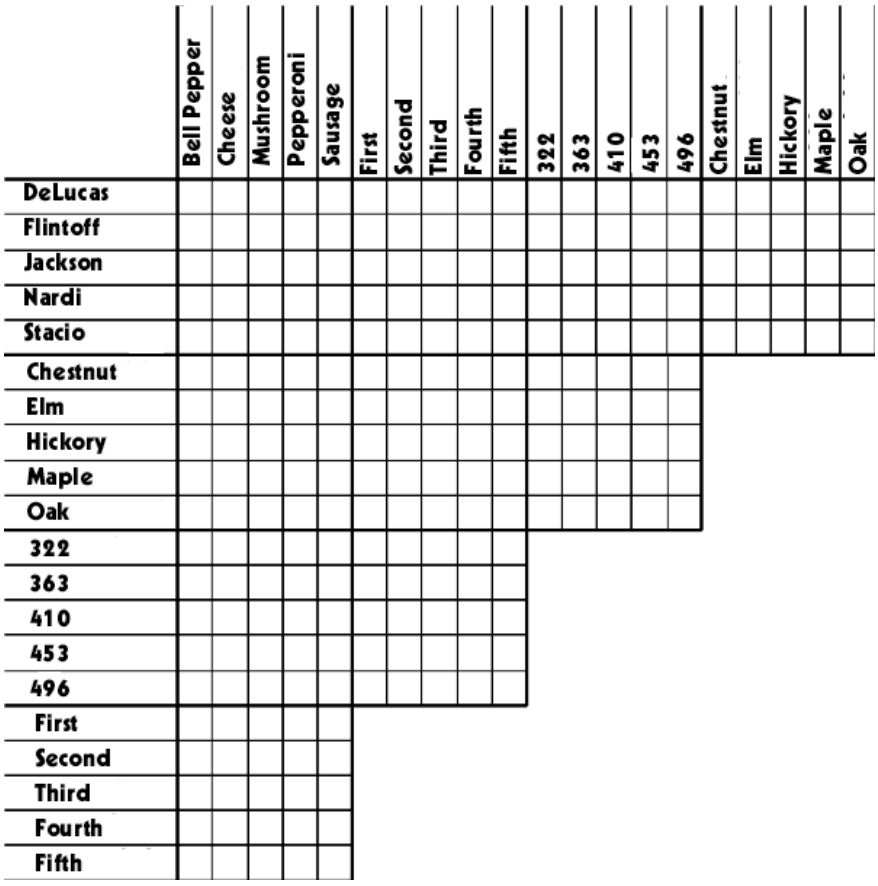
Delivery!

by Kristen Kohli

Difficulty Level: ❸

Mike Carter is in danger of losing his pizza delivery job. Now it seems he has lost his delivery instructions again, and knows he'll get fired if he has to call in to find out where to bring these pizzas. Help him sort out which family ordered what type of pizza, their house number and street name, and what order the pizzas will need to be delivered in.

Clues:


1. Jackson, whose house address has a three in it, ordered later than the family on Hickory, and immediately before the house with the mushroom pizza.
2. Nardi's house number is 43 digits away from the house number of the family who ordered fourth.
3. The families who ordered first and last are the only ones with house numbers divisible by three.
4. The people at house number 496 ordered immediately before DeLucas, but later than both the family on Elm and the family who ordered cheese pizza.
5. Stacio ordered right after the house on Hickory, and right before the pepperoni pizza.
6. Jackson ordered later than the house on Elm, but earlier than the sausage eaters, whose street name begins with a vowel.
7. Flintoff doesn't live on Maple.
