# Labor Day!

By Kristen Kohli

Difficulty Level: ❷

Scenario:

Five women (including Jane) gave birth on different days last week, between Tuesday and Saturday. Among the names given to the babies were Jared, and Hannah. The women were in different locations when they went into labor (including the park, and the grocery store). Using the clues below, determine what each woman named her child, where she went into labor, and what day she gave birth.

Clues:

1. No mother shares the same first initial with her child, although one mother did give birth on a day starting with her first initial.
2. The woman who went into labor in the theater gave birth to her son at some point before Julie, but at some point after Kevin's mom.
3. The two women who gave birth to girls went into labor indoors.
4. Lauren's daughter was born the day before Teresa's baby, who was not named Jacob.
5. Kathleen gave birth at some time after Leah's mother, who did not go into labor at home.
6. The woman who gave birth on Tuesday did not go into labor in her car.
